President’s Appreciation Award

As customary, President Hall recognized UVI employees or units that have performed exceptionally with the President’s Appreciation Award. He stated that it was very easy to celebrate the accomplishments of those who are in positions of leadership, and overlook the daily achievements and contributions of those who are critical to the operations of the University.

This meeting’s award was presented to the Physical Plant employees on both campuses. President Hall noted that they play a critical role each day in ensuring that our campus facilities are cleaned, repaired and safe. He added that they work long hours, indoors and in the heat. They come to our rescue and address the University needs twenty-four hours a day. They are indispensable to our success and this award was a small recognition of the great contributions they provide each day.

Several members of the Board thanked President Hall on his substantive and comprehensive report for this quarter.

BOARD COMMITTEE REPORTS

ACADEMIC, RESEARCH, STUDENT AFFAIRS…………………………….Dr. Yvonne E. L. Thraen

Bachelors of Science - Physics

At the invitation of the Chair of the Committee, Dr. David Morris, Assistant Professor of Physics in the College of Science and Mathematics, presented the proposal for the Bachelor of Science degree program in Physics with a concentration in Astronomy, as approved by the faculty.

Dr. Morris stated that the program is designed to provide students with quality academic training in Physics and with authentic research experience in the subfield of astronomy and astrophysics. Students will continue using the Applied Mathematics paradigm until the sophomore year. Eight additional courses and two seminars have been added to the paradigm in order to meet the requirements for this degree. Adding the additional courses raises the level of the program to a bachelor’s degree and eliminates the need for a concentration in Physics.

Trustee Thraen reported that the ARSA Committee voted unanimously to accept the proposal for the Bachelor of Science degree program in Physics. The committee’s recommendation is forwarded to the full Board for its review and action.

Members of the Board expressed their pleasure with the addition of this degree program and offered congratulations to the President and Provost.

After the presentation and brief discussion, a motion was made by Trustee Thraen, which was seconded by Vice Chairman Moorhead, to approve the Bachelor of Science in Physics as presented. The vote to approve the motion was unanimous.
