

UVI RTPark To Host VIP Investment Showcase During Caribbean Week In New York

CaribPR Wire, NEW YORK, NY, May 19, 2017: The University of the Virgin Islands Research & Technology Park, (UVI RTPark), will celebrate Caribbean Week in New York and Caribbean American Heritage Month in the USA with a Big Apple VIP Investment Showcase Reception this June.

The event is set to introduce the opportunities of the RTPark program to business leaders and key members of the Caribbean Diaspora in New York and highlight the many advantages to doing business with the RTPark program and the US Virgin Islands.

The UVI RTPark program, established in 2002, is a specialist economic development agency that aims to successfully establish the U.S. Virgin Islands as a premier business destination of choice for firms in knowledge and technology intensive sectors. It gives many qualified entrepreneurs and business owners an opportunity to #WorkFromTheBeach by benefiting from generous tax incentives while they enjoy the lifestyle of an island paradise.

Investment projects that are focused on quality are screened for their likelihood of fit in the RTPark program. The priority sectors include bio-medical devices, personalized medicine applications, wellness and healthcare management, energy research and systems, including renewable and clean technology, energy efficiency, energy management and sustainability solutions, as well as firms that will draw on advances in marine science. The RTPark has also had success in attracting Internet advertising firms, technology-mediated entertainment companies and advanced logistics and supply-chain management firms and recently welcomed Intellectual Global Concepts LLC and Anvil 1 LLC as clients.

“The RT Park program is at a very exciting stage. Ten years after our first client, we have fine-tuned the application process and now offer impact investors a unique opportunity and have drawn twenty new companies to the Virgin Islands since 2015,” said RTPark executive director Dr. Gillian Marcelle. “Our recent clients are involved in projects that build the pipeline of skills in the US Virgin Islands and bring new ways of doing business to the Territory while the owners of these businesses enjoy living in an island Paradise.”

The RTPark program is headquartered in a US \$13 million, LEED certified green two-storey, 18,000 square foot building near the main entrance of the University of the Virgin Islands, Albert A. Sheen campus just off of the Queen Mary highway, in St. Croix.
