

University of the Virgin Islands | Cooperative Extension Service | Pesticide Safety Education and Integrated Pest Management Programs

Pesticide Applicator Safety and Integrated Pest Management (IPM) Trainings for “Commercial and Private Applicator License” are held on both the St. Croix and St. Thomas University of the Virgin Islands Campuses. All trainings and examinations are FREE, and administered by Cooperative Extension Service in collaboration with Department of Planning and Natural Resources (DPNR). Register with Dr. Amy J. Dreves by calling 340-692-4052 or emailing Amy.Dreves@live.uvi.edu. If there is a training, you are interested in, contact Dr. Dreves.

Federal law requires any person who applies or supervises the use of restricted use pesticides (RUPs) to be certified. Trainings are offered to teach applicators of Environmental Protection Agency (EPA) laws and regulations, applying RUPs properly and effectively, comprehending pesticide labels, calculating rates, integrating best pest management tools, and practicing safe pesticide use.
